respiration. Consult a physician.

Dermal Exposure Wash off with soap and plenty of water. Consult a physician.

Eye Exposure Rinse thoroughly with plenty of water for at least 15 minutes and consult

a physician.

Oral Exposure Never give anything by mouth to an unconscious person. Rinse mouth

with water. Consult a physician.

Most important symptoms and effects, both acute and delayed: The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11

Indication of any immediate medical attention and special treatment needed: No data available

5. FIREFIGHTING MEASURES

Suitable Extinguishing

Media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Protective Equipment

Wear self-contained breathing apparatus for firefighting if necessary.

Specific Hazard(s)

Sulfur oxides, zinc/zinc oxides

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions Use personal protective equipment. Avoid dust formation. Avoid

breathing vapors, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing dust. For personal protection

see section 8.

Environmental Precautions Prevent further leakage or spillage if safe to do so. Do not let product

enter drains. Avoid discharge into the environment.

Methods for Cleaning Up Pick up and arrange disposal without creating dust. Sweep up and

shovel. Keep in suitable, closed containers for disposal.

Reference to Other Sections For disposal see section 13.

7. HANDLING AND STORAGE

Handling Avoid contact with skin and eyes. Avoid formation of dust and aerosols.

Provide appropriate exhaust ventilation at places where dust is formed.

For precautions see section 2.

Storage Keep container tightly closed in a dry and well-ventilated place.

Hygroscopic - Keep in a dry place.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Control Parameters Components with workplace control parameters

Contains no substances with occupational exposure limit values.

Engineering Controls Handle in accordance with good industrial hygiene and safety practice.

Wash hands before breaks and at the end of workday.

**Personal Protective Equipment** 

Eye/Face Face shield and safety glasses. Use equipment for eye protection tested

and approved under appropriate government standards such as NIOSH

(US) or EN 166(EU).

Skin Handle with gloves. Gloves must be inspected prior to use. Use proper

glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash

and dry hands.

Body Complete suit protecting against chemicals, The type of protective

equipment must be selected according to the concentration and amount

of the dangerous substance at the specific workplace.

Respiratory Where risk assessment shows air-purifying respirators are appropriate

use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate

government standards such as NIOSH (US) or CEN (EU).

Control Environmental Exposure Prevent further leakage or spillage if safe to do so. Do not let product

enter drains. Discharge into the environment must be avoided.

Zinc oxide dust or fume can irritate the respiratory tract. Prolonged skin contact can produce a severe dermatitis called "oxide pox." Exposure to high levels of dust or fume can cause metallic taste, marked thirst, coughing, fatigue, weakness, muscular pain and nausea followed by fever and chills. Severe overexposure may result in bronchitis or pneumonia with a bluish tint to the skin. To the best of our knowledge, the chemical, physical and toxicological properties have not been

thoroughly investigated.
